Admin should be able to make changes anywhere as required.

Admin should have full control to adjust layout alignment (up, down, left, right) throughout the panel.

Admin must be able to edit/update anytime

◆ Certificate Section

When a user clicks "Download Certificate" after completing a course OR in separate section of certificate:

1. A popup must appear with questions set by Admin.

2. If the user answers correctly → show a Success message → certificate downloads automatically.

3. Each course should have its own set of admin-created questions.

4. If answers are wrong → show Try Again until correct.

Admin must be able to edit/update anytime

◆ Payout Section

The system must calculate affiliate earnings from Monday to Sunday.

Payments will be released on the next Wednesday or Thursday.

Affiliates must be able to track weekly active + passive earnings.

System should calculate active and passive separately and also show the total earnings in the next column.

Email Templates should be custom

Only active → show active earnings.

Only passive → show passive earnings.

Both active + passive → show both clearly in one email.

WhatsApp Notification and Mail

Automatically send a message:

> "Dear learner, you earned ₹____ from ___ to ___. It has been credited to your bank account." Like this we will provid

Weekly Payment Mail Must Include

> "Your weekly earnings from [start date] to [end date] have been credited to your bank account."

Admin Flexibility

Admin can change payout week range (example: Monday–Wednesday).

Admin must be able to edit/update anytime
